1. Company Overview & Contact

About Us

OrbitFX is built and operated by **Orbitfx Solution** — a Dubai-based financial technology company founded in 2026, building institutional-grade trading infrastructure for brokers across the Middle East, Asia-Pacific, and beyond. Orbitfx Solution is the technology company behind OrbitFX, a full-stack brokerage platform serving retail brokers, institutions, and white-label operators.

The company was founded to solve a clear problem: the brokerage technology market was fragmented, outdated, and inaccessible to operators who needed a modern, reliable foundation to launch and scale. Today, OrbitFX is a unified platform covering client portals, manager back-office, risk management, KYC/AML, liquidity access, and mobile apps — fully white-labelled, cloud-hosted, and built to scale from day one.

The company operates from the International Business Tower in Business Bay, Dubai, with a team of engineers, compliance specialists, and market professionals.

Company at a Glance

Company Timeline

- Jan 2026 — Founded: Orbitfx Solution established in Dubai as a financial technology company focused on brokerage infrastructure
- Feb 2026 — Platform Build: core development begins on the broker back-office infrastructure, trading terminals, and client portal
- Mar 2026 — Liquidity Partnerships: secured liquidity relationships with tier-1 banks and ECN providers
- Apr 2026 — Beta Launch: OrbitFX Platform enters closed beta with select partners
- May 2026 — First Clients: onboarded first brokerage clients across the Middle East and Asia-Pacific, delivering white-labelled deployments
- Jun 2026 — Full Release: OrbitFX Platform v1 officially released, including AI-enhanced terminals, institutional desk, and regulatory reporting suite

Our Principles

- Precision — features ship when they're right, not when they're rushed
- Transparency — clear timelines, limitations, and pricing; no hidden clauses or vague SLAs
- Accountability — owning outcomes, fixing issues, and explaining what went wrong
- Ambition — building infrastructure for the next decade of retail brokerage

2. User Roles & Permissions

OrbitFX Solution has **3 user roles**, each with a distinct scope of access. Managers can be granted up to **18+ individual permission keys** and **5 feature flags** by the Admin.

Role 1: Client / Trader (Account Holder)

- Live & demo account trading
- TradingView Advanced Charts
- Copy signals & auto-copy trades
- Advanced analytics & P&L; reports
- Live market news in-platform
- Economic calendar with countdowns
- Deposit & withdrawal requests
- Mobile PWA app (iOS & Android)
- Multi-account dashboard
- Real-time notifications & alerts

Role 2: Manager / IB (Desk Manager)

- Manage all assigned client accounts
- Process deposits & withdrawals
- Credit bonus & transfer funds
- Place manual trades for clients
- Close & edit client trades
- Manage copy trading & signals
- Export PDF account statements
- Send client notifications
- View full audit log
- All actions constrained within admin-set permissions

Role 3: Admin / Broker (Platform Owner)

- Full client & account management
- Create & configure all managers
- Assign 18+ permission keys per manager
- Enable/disable 5 feature flags per manager
- Spread markup & swap configuration
- Live risk dashboard (exposure view)
- Full audit log & PDF reports
- Trade operations oversight
- Platform-wide announcements & communications
- Complete brokerage back-office control

Manager Permission Key Categories (18+ keys)

- Client ops: create clients, delete clients, manage managers
- Finance: process deposits/withdrawals, credit bonus, transfer funds, edit/delete financials
- Trades: manual trade, close trades, edit trades, delete trades
- Tools: view audit log, export PDF, send notifications, edit spread
- Features: copy trading, analytics, news, calendar, referral program

3. Getting Started: Creating an Account

Account creation combines the OrbitFX platform onboarding flow with a tiered account structure.

Step 1 — Choose an account tier

Tier	Min. Deposit	Max Leverage	Onboarding Time
Starter	\$500	1:100	1 business day
Professional	\$5,000	1:200	2–3 business days
Prime	\$25,000	1:400	3–5 business days
Institutional	\$100,000+	1:500	Custom timeline

Step 2 — Complete KYC verification

- Provide a valid government-issued photo ID: Passport, National ID Card, or Driver's Licence
- Provide address proof: utility bill, bank statement, or official government letter (issued within 90 days)
- Enhanced due diligence is required for PEPs (Politically Exposed Persons), high-risk jurisdictions, or deposits over \$10,000
- Screening is run automatically against UN, OFAC, EU, and UK sanctions lists on onboarding and on an ongoing basis

Step 3 — Access the platform

- Once approved, log in to the web Client Portal or install the mobile PWA (iOS Safari / Android Chrome, no app store needed)
- Multiple LIVE and DEMO accounts can be created and switched instantly from one login (Multi-Account Dashboard)
- White-label branding, custom domain, and custom instruments are available on Prime and Institutional tiers — contact sales

How to Create a Demo Account

To create a demo account: log in, open the Multi-Account Dashboard, and add a new DEMO account. Creating a demo account does not require KYC verification or a minimum deposit — demo accounts use virtual funds only, so you can create a demo account and start practising immediately after logging in.

- Step 1: Log in to the Client Portal (web or mobile PWA)
- Step 2: Open the Multi-Account Dashboard and select “Add Account” to create a new account
- Step 3: When creating the account, choose the DEMO account type instead of LIVE — no KYC documents or deposit are required to create a demo account
- Step 4: Set a starting virtual balance and select the base currency for the new demo account
- Step 5: The new demo account is created instantly and appears on the dashboard, styled differently from LIVE account cards
- Step 6: Switch between your LIVE and DEMO accounts instantly, without re-login, using the same Multi-Account Dashboard
- Step 7: A demo account can later be upgraded to a LIVE account at any time by completing KYC and making a real deposit

4. Client Panel Features (Trader Tools)

OrbitFX gives every trader 9 core client-side features, accessible from desktop and mobile:

Live Trading & Advanced Charts

- One-click market, limit & stop orders
- TradingView Advanced Charts with colored position lines per trade
- Real-time P&L, balance & equity updates
- SL / TP lines displayed on chart automatically
- Lightweight Charts option for a lightweight panel view

Copy Trading & Signals

- Browse and subscribe to active signal providers
- Trades auto-copied to account in real-time
- Adjustable copy lot ratio per provider
- Track provider performance history & win rate
- Start or stop copying with a single tap

Advanced Analytics

- P&L; breakdown by symbol, date & period
- Win rate, loss rate & average trade size
- Equity curve & drawdown history chart
- Best and worst performing symbols
- Downloadable trade report summary

Market News Feed

- Real-time financial news from live sources, displayed inside the platform (no tab-switching)
- News visible alongside open trades & charts to help traders react quickly to market events

Economic Calendar

- High / Medium / Low impact colour coding
- Filter by country, currency & impact level
- Countdown timer to each scheduled release
- Actual vs forecast vs previous values shown

Multi-Account Dashboard

- Multiple LIVE and DEMO accounts per client, one login
- Animated premium account cards (distinct LIVE/DEMO)
- Instant account switch without re-login
- Balance, equity & margin visible per account

Mobile App — iOS & Android (PWA)

- Installable directly from the browser — no app store required
- Safe area support for notched & rounded devices
- Bottom tab navigation optimised for mobile trading
- Real-time portfolio sync across all devices

Deposits & Withdrawals (in-platform request flow)

- Submit deposit requests with amount & method
- Submit withdrawal requests with bank/wallet details
- Live status tracking: Pending → Approved → Processed
- Push notification on approval or rejection
- Full transaction history with timestamps

Notifications & Alerts

- Trade opened / closed / margin call alerts
- Deposit & withdrawal status notifications
- Direct messages from assigned manager
- Platform announcements & news alerts

5. Manager / IB Tools

Client Portfolio Management

- All assigned client accounts in one view
- Balance, equity, margin & free margin per account
- Open trades, pending orders & closed trade history
- KYC document status per client
- Search, filter & sort across all client accounts

Process Deposits & Withdrawals

- View all pending deposit & withdrawal requests
- Approve or reject with optional notes
- Credit bonus amounts directly to accounts
- Transfer funds between client accounts
- All actions auto-logged in the audit trail

Copy Trading Management

- Create & configure signal provider accounts
- Set and adjust copy lot ratios for followers
- View all active subscriber relationships
- Monitor provider trade history & performance
- Stop or pause copy relationships at any time

Trade Operations

- Place manual trades on any assigned client account
- Close open positions with one click
- Edit trade SL & TP levels
- View real-time P&L; per trade and per account
- Full trade log with manager action timestamps

Reports & PDF Statements

- Export PDF account statement per client
- Includes trades, deposits & withdrawal history
- Date-range filtering for custom period reports
- Full audit log access for compliance review

Client Communications

- Broadcast notification to all assigned clients
- Send direct messages to individual accounts
- Announce promotions, events & platform updates
- Personalised account-specific alerts

6. Admin Back Office

Granular Manager Permissions (18+ Keys)

- Assign exactly the right access to each manager — every permission is individually controllable

Full Client & Account Management

- Create, edit & deactivate client accounts
- Assign clients to specific managers
- Configure account type, leverage & group
- Manage KYC documents & verification status
- View complete financial & trade history per client

Risk Management & Spread Control

- Per-group spread markup (fixed pip or percentage)
- Enable or disable swap charges per account group
- Set account type parameters & leverage limits
- Real-time risk dashboard: total open exposure
- Monitor margin levels across all live accounts

Feature Flags & Access Control (5 premium tools)

- Copy Trading — auto-copy & signal subscriptions
- Advanced Analytics — detailed performance reporting
- Market News Feed — live in-platform news
- Economic Calendar — events with impact & countdowns
- Referral Program — client invite & earn bonuses

7. Platform Architecture & Technology

Core Architecture

The platform is built on a microservices architecture deployed across geographically redundant data centres. Core components include the Order Management System (OMS), Risk Engine, Liquidity Aggregator, Trade Reporting Module, Client Portal, and Chatbot Layer — all communicating over encrypted internal messaging buses with sub-millisecond latency.

Component	Technology	Role
Order Management System	C++ / FIX Protocol	Order routing, matching, lifecycle management
Risk Engine	Java / Apache Kafka	Real-time P&L, margin, and exposure monitoring
Liquidity Aggregator	Python / gRPC	Price aggregation from 15+ LP feeds
Client Portal	React / Next.js	Web-based dashboard for brokers and traders
Reporting Module	PostgreSQL / S3	Regulatory and internal trade reporting
Chatbot Layer	REST / WebSocket	AI chatbot integration for client support

Production Technology Stack (OrbitFX)

- Charting: TradingView Advanced Charts + Lightweight Charts (dual engine)
- Mobile: PWA — installable on iOS & Android, no app store needed
- Real-time: WebSockets for live price ticks, P&L; & position sync
- Security: 2FA + OAuth — Google login, TOTP two-factor authentication
- Permissions: Role-based, 18+ keys, two-gate feature flag control
- Reports: PDF export — statements, trade history & audit log
- Accounts: Multi-account — unlimited LIVE & DEMO per client
- Deployment: Docker — single command deploy, production ready

Key Technical Specifications

- Execution latency: < 1ms order acknowledgement (co-located infrastructure)
- Uptime SLA: 99.9% guaranteed with N+1 redundancy across all critical components
- Security: 256-bit AES encryption at rest, TLS 1.3 in transit, ISO 27001 certified
- API protocols: FIX 4.4, FIX 5.0, REST (JSON), WebSocket (streaming prices/trades)
- Data centres: Equinix LD4 (London), NY5 (New York), TY3 (Tokyo); DR in SG1 (Singapore)
- Backup & recovery: RPO < 5 minutes, RTO < 15 minutes

System Requirements

Component	Minimum	Recommended
Operating System	Windows 10 / macOS 11	Windows 11 / macOS 14 / Ubuntu 22.04
RAM	4 GB	16 GB
CPU	Dual-core 2.0 GHz	Octa-core 3.5 GHz

Component	Minimum	Recommended
Network	10 Mbps broadband	100 Mbps dedicated leased line
Browser (Web App)	Chrome 110 / Firefox 115	Chrome latest / Edge latest
Mobile	iOS 14 / Android 10	iOS 17 / Android 14

8. Trading Products & Instruments

Over 800 tradable instruments across six asset classes:

Asset Class	Instruments	No. of Symbols	Execution Model
Forex (FX)	Major, Minor, Exotic	70+	STP / ECN
CFDs	Indices, Stocks	200+	Market Making / STP
Cryptocurrencies	Spot & Perpetual	50+	ECN
Commodities	Metals, Energy, Agri	25+	STP
Equities	Global Stocks	500+	DMA
Fixed Income	Bonds, Treasuries	30+	RFQ

Forex (FX)

70+ currency pairs across Majors, Minors, and Exotics. Trading is available 24 hours a day, 5 days a week (Sunday 22:00 UTC — Friday 22:00 UTC). Traded as spot contracts with T+2 settlement, or automatically rolled for retail CFD clients.

CFDs

CFDs are offered on indices, equities, commodities, and crypto, allowing clients to speculate on price movement without owning the underlying asset. All CFD positions attract overnight swap charges when held past the daily cut-off.

Category	Examples	Leverage (max)	Margin Req.
Stock CFDs	AAPL, TSLA, AMZN, GOOGL, MSFT	1:20	5%
Index CFDs	US30, NAS100, UK100, DE40, JP225	1:50	2%
Commodity CFDs	XAU/USD, CL1!, NG1!, XAG/USD	1:20	5%
Crypto CFDs	BTC/USD, ETH/USD, SOL/USD	1:5	20%

Cryptocurrency Trading

Spot and perpetual contracts with deep liquidity aggregated from leading crypto exchanges. Perpetual contracts have no expiry; funding rates apply every 8 hours.

Symbol	Type	Min Tick	Max Leverage	Funding
BTC/USD	Spot + Perp	\$0.10	1:5	8 hours
ETH/USD	Spot + Perp	\$0.01	1:5	8 hours
SOL/USD	Spot + Perp	\$0.001	1:3	8 hours
BNB/USD	Spot	\$0.01	1:3	N/A
XRP/USD	Spot + Perp	\$0.0001	1:3	8 hours

9. Account Tiers, Leverage & Margin

Feature	Starter	Professional	Prime	Institutional
Min. Deposit	\$500	\$5,000	\$25,000	\$100,000+
Max Leverage	1:100	1:200	1:400	1:500
Spread Type	Standard	Raw	Raw	Raw + Rebate
Commission	None	\$3/lot	\$2/lot	Custom
Account Manager	Shared	Dedicated	Senior	Executive
Support Priority	Standard	Priority	Priority	24/7 Hotline
API Access	REST only	REST + FIX	Full Suite	Full Suite
White-Label	No	No	Yes	Yes
Custom Instruments	No	No	Yes	Yes

Leverage & Margin by Instrument

Instrument	Std Leverage	Margin Req.	Margin Call	Stop-Out
FX Majors	1:400	0.25%	50%	20%
FX Minors	1:200	0.5%	50%	20%
FX Exotics	1:100	1.0%	80%	30%
Index CFDs	1:50	2.0%	80%	30%
Stock CFDs	1:20	5.0%	80%	30%
Gold (XAU/USD)	1:20	5.0%	80%	30%
Crypto (BTC)	1:5	20.0%	100%	50%

10. Order Types & Execution Models

Supported Order Types

Order Type	Description	Use Case
Market Order	Executes immediately at best available price	Entering/exiting quickly
Limit Order	Executes only at specified price or better	Precise entry/exit points
Stop Order	Triggers a market order when price hits stop level	Breakout trading
Stop Limit	Triggers a limit order at the stop price	Controlled breakout entries
Trailing Stop	Stop level moves with price by defined distance	Locking in profits
OCO (One Cancels Other)	Pair of orders; one cancels when other executes	Bracket trading strategies
If Done	Secondary order activates when primary fills	Conditional order chains
Good Till Cancelled	Remains active until manually cancelled	Long-term pending orders
Good Till Date	Active until specified date/time	Event-based trading
Fill or Kill	Must fill entire quantity immediately or cancel	Large institutional orders
Immediate or Cancel	Fills what it can immediately, cancels remainder	Partial fill tolerance

Execution Models

- STP (Straight-Through Processing): orders passed directly to liquidity providers, no dealing desk, no re-quotes
- ECN (Electronic Communications Network): orders matched in a pool of LPs, brokers and institutions; tight spreads, commission-based pricing
- Market Making: the broker acts as counterparty; fixed spreads available, suited to low-volatility instruments
- DMA (Direct Market Access): for equity CFDs, orders routed directly to the exchange order book with level 2 depth

11. Fees, Spreads & Commissions

Indicative Spread Schedule

Instrument	Raw Spread	Standard Spread	Peak Hours	Off-Hours
EUR/USD	0.0 pip	1.0 pip	0.1–0.3 pips	0.5–1.0 pips
GBP/USD	0.0 pip	1.2 pips	0.2–0.5 pips	0.8–1.5 pips
USD/JPY	0.0 pip	1.0 pip	0.1–0.4 pips	0.5–1.2 pips
XAU/USD	0.10	0.30	0.10–0.20	0.20–0.40
BTC/USD	\$5	\$20	\$5–\$10	\$15–\$30
US30	0.5 pts	1.5 pts	0.5–1.0 pts	1.0–2.5 pts
NAS100	0.5 pts	1.5 pts	0.5–1.2 pts	1.2–2.5 pts

Commission Structure

Account Tier	Instrument	Commission (per lot round turn)	Notes
Professional	FX / Metals	\$6.00	Charged on open + close
Professional	Indices	\$4.00	Per contract
Professional	Crypto	0.05% of notional	Percentage-based
Prime	FX / Metals	\$2.00	Volume discount available
Prime	Indices	\$1.50	Per contract
Institutional	All	Negotiated	Call for bespoke pricing

Swap / Rollover Rates

Positions held overnight attract swap charges or credits based on the interest rate differential between the two currencies in a pair. Swaps apply at 22:00 GMT (server time). Triple swaps apply on Wednesdays to cover the weekend period.

Instrument	Long Swap (pips/lot)	Short Swap (pips/lot)	Triple Day
EUR/USD	-0.52	+0.13	Wednesday
GBP/USD	-0.78	+0.32	Wednesday
USD/JPY	+0.15	-0.48	Wednesday
XAU/USD	-2.30	-1.80	Wednesday
BTC/USD	-5.00% p.a.	-5.00% p.a.	Daily

12. Deposits & Withdrawals

How to make a deposit

- Log in to the OrbitFX Client Portal (web or mobile PWA)
- Open the Deposits & Withdrawals section and submit a deposit request, specifying the amount and method
- Choose a payment method: Bank Wire, Credit/Debit Card, USDT (TRC-20 or ERC-20), Bitcoin, or local LKR bank transfer
- Track the request status live through the platform: Pending → Approved → Processed
- You will receive a push notification once the deposit is approved or rejected
- Once processed, the deposit appears in your full transaction history with a timestamp

How to make a withdrawal

- From the same Deposits & Withdrawals section, submit a withdrawal request with your bank or wallet details
- Your assigned manager or the back office reviews and approves the request (all approvals are logged in the audit trail)
- Status is tracked live through to completion, with a push notification on approval or rejection

Payment Methods & Fees

Method	Currency	Min Amount	Max Amount	Fee	Processing Time
Bank Wire	USD/EUR	\$500	Unlimited	Free	1–3 business days
Credit/Debit Card	USD/EUR	\$50	\$10,000	1.5%	Instant
USDT (TRC-20)	USDT	\$100	Unlimited	Network fee	15–30 minutes
USDT (ERC-20)	USDT	\$100	Unlimited	Network fee	5–15 minutes
Bitcoin	BTC	0.001 BTC	Unlimited	Network fee	1–3 confirmations
Local Bank (LK)	LKR	LKR 10,000	LKR 500,000	Free	Same day

Bank wire and local LKR transfers are fee-free. Credit/debit cards attract a 1.5% processing fee. Cryptocurrency deposits pay only the applicable network gas fee. Withdrawal timing: bank wire 1–3 business days, card refunds 3–5 business days, crypto processed within 2 business hours after approval.

13. Risk Management

Margin Call & Stop-Out

A two-stage margin management system is used. When account equity falls to the Margin Call level, the client receives an automated alert. If equity continues to fall to the Stop-Out level, positions are automatically closed — largest loss first — to protect the account from negative equity.

Margin Level (%) = (Equity / Used Margin) × 100, where Equity = Balance + Floating P&L.; Example: Balance \$1,000, Used Margin \$200, Floating P&L; -\$600 → Margin Level = (\$1,000-\$600)/\$200 × 100 = 200%.

Negative Balance Protection

All retail client accounts are protected against negative balances. If a Stop-Out event results in equity going below zero (e.g. due to extreme slippage in fast markets), the account balance is reset to zero at no charge. This protection does not apply to professional or institutional accounts unless explicitly stated.

Risk Controls & Alerts

- Email and SMS alerts at configurable margin thresholds (e.g. 200%, 150%, 100%)
- Daily loss limit controls configurable by broker administrators
- Maximum open position limits per instrument and overall
- IP-based login anomaly detection and account lock on suspicious activity
- Real-time exposure dashboard for broker risk desks
- Automatic hedging triggers for correlated position risk

Hedging Policy

Both full and partial hedging are supported. Clients may hold simultaneous long and short positions in the same instrument; both legs attract margin and swap independently unless netting mode is enabled by the broker.

14. Liquidity, APIs & Connectivity

Liquidity Providers

Provider Type	Examples	Assets Covered
Tier-1 Prime Banks	JPMorgan, Deutsche Bank, Citi, HSBC	FX, Fixed Income, Metals
ECN/MTF Venues	EBS, Reuters Matching, Currenex	FX, Crypto
Regional Prime Brokers	FXCM Prime, Saxo Markets	FX, CFDs, Equities
Crypto Exchanges	Binance, Coinbase Prime, Kraken	Crypto Spot & Perps
Equity DMA	NYSE, NASDAQ, LSE (via IRESS)	Equities, ETFs

FIX API

Parameter	Value
FIX Version	FIX 4.4 / FIX 5.0 SP2
Connection	TCP/IP over TLS 1.3
Default Port	5001 (Price) / 5002 (Order) / 5003 (Drop Copy)
Heartbeat Interval	30 seconds
Session Times	Sunday 22:00 – Friday 22:00 UTC
Logon Auth	SenderCompID + Password (SHA-256 hashed)
Max Order Rate	100 orders/second per session
Price Depth	20 levels (top of book default)
Latency (colo)	< 1ms acknowledgement

WebSocket & REST API

REST Base URL: <https://api.cubexenterprises.com/v2/> | WebSocket Endpoint:
<wss://stream.cubexenterprises.com/v2/realtime>

Endpoint	Method	Description
/auth/token	POST	Obtain JWT bearer token
/accounts/{id}/balance	GET	Retrieve account balance & equity
/orders	POST	Place new order
/orders/{id}	DELETE	Cancel pending order
/orders/{id}	PUT	Modify pending order
/positions	GET	List all open positions
/positions/{id}/close	POST	Close specific position

Endpoint	Method	Description
/instruments	GET	List all tradable instruments
/instruments/{sym}/quote	GET	Get current bid/ask for symbol
/reports/trades	GET	Download trade history (CSV/JSON)
/chatbot/query	POST	Chatbot integration endpoint

15. Compliance & Regulation (KYC/AML)

Regulatory Framework

Orbitfx Solution operates on ISO 27001-compliant infrastructure with full audit trails, penetration testing, and contractual uptime guarantees. Clients are onboarded only through regulated broker entities. As a technology provider, the platform supports broker compliance with frameworks including ASIC RG 264, MiFID II/MiFIR, ESMA Guidelines, SEC/FINRA, ISO 27001, GDPR (EU), SOC 2 Type II logging, and FATF Recommendations.

Trust Center Highlights

- ISO 27001 Compliant — information security management certified across all production infrastructure
- SOC 2 Type II Logging — full audit trail and access logging aligned with SOC 2 operational standards
- GDPR Data Practices — client data handling policies aligned with GDPR for EU-facing broker operations
- 99.9% Uptime SLA — contractual uptime guarantees backed by multi-region failover and monitoring
- Penetration Testing — bi-annual third-party penetration testing with published remediation reports
- Responsible Disclosure — public vulnerability disclosure programme; report security issues to security@OrbitFXSolution.com (48-hour response)

KYC / AML Requirements

- Identity document: valid government-issued photo ID (Passport, National ID, or Driver's Licence)
- Address proof: utility bill, bank statement, or official government letter issued within 90 days
- Enhanced due diligence required for PEPs, high-risk jurisdictions, and deposits over \$10,000
- Automated sanctions screening against UN, OFAC, EU, and UK lists on onboarding and ongoing basis
- Real-time AML engine flags unusual patterns including structuring, layering, and rapid fund movement
- Suspicious Activity Reports (SARs) filed with the Financial Intelligence Unit (FIU) of Sri Lanka as required

16. Technical Support & SLA

Support Tiers

Tier	Scope	Channel	Hours
Tier 1	General usage, account queries	Chat, Email, Ticket	Mon–Sat 08:00–20:00
Tier 2	Technical issues, API integration	Phone, Email, VPN	Mon–Sat 08:00–20:00
Tier 3	Infrastructure, critical incidents	Direct hotline, Slack	24/7/365
Dedicated	Institutional / Prime accounts	Named engineer + Slack	24/7/365

SLA Commitments

Metric	Target	Critical Target
Platform Uptime	99.9% (monthly)	99.95% (annual)
Ticket Initial Response	< 4 business hours	< 1 hour (P1)
P1 Incident Resolution	< 4 hours	Best effort < 1 hour
P2 Incident Resolution	< 8 business hours	< 4 hours
P3/P4 Resolution	< 5 business days	< 2 business days
Planned Maintenance	Sundays 00:00–04:00 UTC	Prior notice 72h
Price Feed Latency	< 50ms (standard)	< 5ms (co-located)

Incident Severity Definitions

- P1 Critical: complete platform unavailability or data loss — e.g. trading halted, all clients affected
- P2 High: major feature unavailable, significant client impact — e.g. order execution failing for one account tier
- P3 Medium: degraded performance with a workaround available — e.g. slow order confirms, delayed price updates
- P4 Low: minor issue, no trading impact — e.g. UI cosmetic bug, report formatting error

17. Glossary of Terms

Ask — The price at which you can buy an instrument. Also called the offer price.

Bid — The price at which you can sell an instrument.

CFD — Contract for Difference — an agreement to exchange the difference in value of an asset from open to close.

ECN — Electronic Communications Network — a system that matches buy and sell orders from multiple participants.

Equity — Account balance plus or minus any floating (unrealised) profit or loss on open positions.

FIX Protocol — Financial Information eXchange — the industry standard messaging format for financial transactions.

Hedging — Holding opposite positions in the same instrument to reduce directional exposure.

KYC — Know Your Customer — the process of verifying client identity before onboarding.

Leverage — The ability to control a large position with a small amount of capital, expressed as a ratio (e.g. 1:100).

Liquidity — The ease with which an asset can be bought or sold without significantly affecting its price.

Lot — A standardised unit of trade. 1 standard lot = 100,000 units of base currency in FX.

Margin — The amount of capital required to open and maintain a leveraged trading position.

Margin Call — A notification when account equity falls to a defined percentage of used margin, warning the trader to add funds or reduce positions.

MT4 / MT5 — MetaTrader 4 / 5 — popular third-party trading platforms often integrated with broker platforms.

Pip — Percentage in Point — the smallest standard price movement. For EUR/USD, 1 pip = 0.0001.

Requote — When a broker offers a different price than initially requested due to fast-moving markets.

Rollover / Swap — The overnight interest charge or credit applied to positions held past the daily cut-off (22:00 GMT).

SLA — Service Level Agreement — a defined commitment for uptime, response, and resolution times.

Slippage — The difference between the expected trade price and the actual execution price in fast markets.

Spread — The difference between the Bid and Ask price.

STP — Straight-Through Processing — orders are passed directly to LPs without dealing desk intervention.

Stop-Out — Automatic closure of positions when account equity falls below a set margin percentage threshold.

Swap-Free Account — An account type where overnight swap charges are replaced by an administration fee, common for Islamic finance compliance.

Trailing Stop — A dynamic stop-loss order that moves with the market price by a fixed distance to lock in profits.

White-Label — A fully branded platform provided by the technology partner but operating under the client broker's own brand identity.
